## Education

### New York University

*Bachelors of Science in Computer Science*

Brooklyn, NY

*Sep 2020 - May 2023*

## Experience

### Amazon

*Software Development Engineer*

Seattle, WA

*January 2024 - Present*

### Amazon

*Software Development Engineering Intern*

Seattle, WA

*May 2022 - August 2022*

**Data Aggregation Service:** Created a full stack service to visualize last mile delivery data. Created a Typescript React frontend with Polaris styling that calls an AWS backend implemented with Java Lambda Functions, API Gateway, S3, and Internal Amazon Services. Used S3 Select and Spark to filter through about 1TB per query.

**Deployment/Observability Pipeline:** The service is built with the AWS Typescript CDK. It is validated with unit and integration testing before being deployed through CodeDeploy and monitored with CloudWatch alarms and SNS.

### NYU High Speed Research Network (HSRN)

*Academic Researcher*

Brooklyn, NY

*February 2021 - May 2023*

**Parallel File System:** Deployed an NSF funded 6PB storage PFS (SeaweedFS) for usage internally and externally to the HSRN. Automated Deployment with Ansible Playbooks and Rust CLI. Benchmarked with Bonie++ and IOR.

**Clients:** Implemented API of internal broker service for Bash, and did core development on Python, C++, and JS

**Audio Conferencing:** Created an audio service (Portaudio) in C++ that interfaces with internal broker service.

**CI/CD:** Developed documentation, linting, testing, deployment (DinD with Kaniko) pipelines for the project in Gitlab

**Mentorship:** Leader of the student research arm. Managed and onboarded over 110 students over 4 semesters.

### Hewlett Packard Enterprise (Aruba Networks)

*Cloud Intern*

Santa Clara, CA

*June 2019 - August 2019*

**Estimating Bandwidth:** Estimated bandwidth using Auto ARIMA/Prophet and other time series algorithms.

### Sparkup

*Software Development Intern*

Brooklyn, NY

*September 2022 - December 2022*

**UX Development:** Implemented a new feature in React Native App to link names and phone numbers in transactions

### Dark Forest

*Graphics Intern*

San Jose, CA

*December 2021 - February 2022*

**Shader Development:** Created a typescript plugin that allows for custom WebGL shaders in the Dark Forest game.

## Projects

**Synesthesia Visualizer:** Create a visualizer that mimics the experience of Auditory Visual Synthesis with librosa and yin. Utilizes AWS infrastructure (autoscaling ec2 cluster) for compute and WebVR for visuals.

**Delivery Service:** Created a web crawling service to notify available grocery delivery slots for Whole Foods, Costco, or Safeway. Used AWS SNS, ECS, and Lambda functions. Created headless Chrome docker containers running Selenium.

**Git OpenResty:** Created a container that utilized Lua JIT with OpenResty to sync git repos as a git-sync alternative

**K3S Cluster:** Created a portable resilient fault-tolerant k3s cluster that networks through a wireguard mesh (headscale)

**Personal Website:** Self-deployed a BabylonJS website with kubernetes k3s and full CI/CD using Git OpenResty.

**IP Monitor:** Used the QT Framework and built a KDE widget to monitor your public and private IP Addresses.

**Electronic Trombone:** Made a trombone midi controller using Arduino with capacitive sensing and pid controllers.

## Programming Skills

**Langs:** Typescript, Javascript, Node, C++, C, Rust, Java, Python, (e)Lisp, Bash/Zsh, MDown, JSON, YAML, L<sup>A</sup>T<sub>E</sub>X

**Tech:** AWS, Linux, Emacs, QT, Docker, k8s/k3s Rancher, Nginx, Traefik, ReactJS, Tailscale, MongoDB, Postgres, ...

## Certifications

AWS Solutions Architect

*September 2021*

AWS Cloud Practitioner

*August 2021*

Stanford Machine Learning by Andrew Ng

*July 2020*

AWS Fundamentals Specialization

*June 2020*
