

## Education

**New York University**  
*Bachelors of Science in Computer Science*

Brooklyn, NY  
*Sep 2020 - Exp. May 2023*

## Experience

**Amazon**  
*Software Development Engineer*

Seattle, WA  
*July 2023*

**Amazon**  
*Software Development Engineering Intern*

Seattle, WA  
*May 2022 - August 2022*

**Data Aggregation Service:** Created a full stack service to visualize last mile delivery data. Created a Typescript React frontend that calls an AWS API Gateway based backend implemented with Java Lambda Functions, API Gateway, S3, and Internal Amazon Services. Service sifts/caches through up to a TB of data per query with S3 Select.  
**Deployment/Observability Pipeline:** The service is built with the AWS Typescript CDK. It is validated with unit and integration testing before being deployed through CodeDeploy and monitored with CloudWatch alarms and SNS.

**NYU High Speed Research Network (HSRN)**  
*Academic Researcher*

Brooklyn, NY  
*February 2021 - Present*

**Mentorship:** Leader of the student research arm. Managed and onboarded over 70+ students over 4 semesters.  
**Parallel File System:** Prototyped filesystems for 6PB storage cluster for usage internally and externally to the HSRN  
**Client Development:** Developed a Bash client, and worked on Python, C++, and Javascript clients for Corelink.  
**Audio Video Conferencing:** Created an audio/video service in C++ that interfaces with the Corelink network.  
**CI/CD:** Developed documentation, testing, and linting pipelines for the project in Gitlab.

**Sparkup**  
*Software Development Intern*

Brooklyn, NY  
*September 2022 - December 2022*

**UX Development:** Implemented a new feature in React Native App to link names and phone numbers in transactions

**Dark Forest**  
*Graphics Intern*

San Jose, CA  
*December 2021 - February 2022*

**Shader Development:** Implemented a typescript plugin that allows for custom shaders in the Dark Forest game.

**Hewlett Packard Enterprise (Aruba Networks)**  
*Cloud Intern*

Santa Clara, CA  
*June 2019 - August 2019*

**Estimating Bandwidth:** Estimated bandwidth using Auto ARIMA and other time series ML algorithms.

## Projects

**Synesthesia Visualizer:** Create a visualizer that mimics the experience of Auditory Visual Synthesis with librosa and yin. Utilizes AWS infrastructure (autoscaling ec2 cluster) for compute and WebGL for VR.

**Delivery Service:** Created a web crawling service to notify available delivery slots for Whole Foods, Costco, or Safeway. Used AWS SNS, ECS, and Lambda functions. Created headless Chrome docker containers running Selenium.

**Git OpenResty:** Created a container that utilized Lua JIT with OpenResty to sync git repos as a git-sync alternative

**K3S Cluster:** Created a portable resilient fault-tolerant k3s cluster that networks through a wireguard mesh

**Personal Website:** Deployed a website with self-deployed services k3s and full CI/CD using git-sync.

**IP Monitor:** Used the QT Framework and built a KDE widget to monitor public and private IP Addresses.

**Electronic Trombone:** Engineer a trombone midi controller using Arduino with capacitive sensing and pid controllers.

## Programming Skills

**Langs:** Typescript, Javascript, Node, C++, C, Rust, Java, Python, (e)Lisp, Bash/Zsh, MDown, JSON, YAML,  $\LaTeX$

**Tech:** AWS, Linux, Emacs, QT, Docker, k8s/k3s rancher, Nginx, Traefik, ReactJS, Tailscale, MongoDB, MySQL, ...

## Certifications

AWS Solutions Architect  
AWS Cloud Practitioner  
Stanford Machine Learning by Andrew Ng  
AWS Fundamentals Specialization

*September 2021*  
*August 2021*  
*July 2020*  
*June 2020*
